Class leading
patient comfort

The T688 features a powder-coated all steel frame. By using a blend of foams, a contoured seating position is achieved to ensure optimal patient comfort.
“I’m looking for patient comfort and staff safety.”

Sally, Adelaide Nurse

Designed for staff safety

Staff safety is paramount in providing optimum care, and the T688 incorporates a range of features to ensure convenience and staff safety are not compromised for patient comfort.
Adjustable Arm Rests
Arm rest height can be adjusted for patient comfort or removed completely, allowing easy access for mobility-impaired patients and ensuring the safety of both patients and staff when transferring to and from the chair.

Patient Hand Control
Patients have the power to adjust the back and leg positions of the chair at the push of a button – giving them control of their own comfort.

Removable Upholstery
Meeting infection control obligations is made easier with the T688. The removable, non-porous covering makes cleaning a breeze.

Class leading comfort and control
The T688 combines ergonomic design with exacting safety features, a high degree of adjustability, and thoughtful details to help staff provide the best possible support and care to patients.
Height Adjustable Chair
Staff can easily change the chair height to an optimum position for reduced risk of back injury, helping you meet your Occupational Health and Safety obligations.

Central Locking Casters
For easy manoeuvrability, central locking casters can be quickly locked in place and released.

Compact Footprint
Space is always at a premium in any healthcare facility, but the T688’s smart design and smaller footprint allows more room between patients, ensuring both improved safety and more privacy.

One Touch Emergency
At the touch of a button the T688 instantly moves into the Trendelenburg emergency position, giving you precious time to urgently attend to your patient’s needs.

Ergonomics – contoured backrest featuring lumbar and lateral support with an adjustable headrest aiding patient comfort.

Space-saving design for improved ambience and safety.

Standard model with zoned cushioning system for patients up to 200kg.

Staff Hand Control with presets
This can be programmed to include an emergency position, treatment / cleaning position and pre-treatment position. At the touch of a button the chair automatically moves to your desired position, with no wasted time or effort.
